

Implementing OHSAS 18001

In keeping with the drive for operational excellence throughout Petrotrin, the Operational Support Services unit based in Santa Flora is moving toward implementing the Occupational Health and Safety Assessment Series 18001 Certification. The OSS comprises departments such as Electrical, Tools and Services, Drilling, Field Equipment Maintenance Trunk Pipelines, Projects and Civil throughout LNE Operations.

At right is Production Manager Foster Yee Ching**

Risk assessments have been conducted in each of these departments and ten control programs were developed in a bid to address the ten highest risks that have been identified. The control programmes for implementation of OHSAS 18001 are:

- Training
- Standard Field Operating Instructions
- Accident Investigations
- Inspections - workshops, rigs, vehicles
- Chemical Safety Management
- Hearing Conservation Programme
- Basic First Aid
- Safe work System
- Emergency Response Plans
- Communication
- Documentation
- HSE Contractor Management
- HSE Contractor Management Programme
